Cell: 8897256651

CAREER OBJECTIVE

B.Tech Computer & Communication Engineering student passionate about AI and embedded systems. Proven ability to build solutions (Python, TensorFlow, ARM microcontrollers) through projects like air quality prediction and hotel management systems. Seeking opportunities to apply my skills in ML, data analysis, or IoT while learning collaboratively.

ACADEMIC

COURSE	INSTITUTE / UNIVERSITY	YEAR OF PASSING	GRADE / PERCENTAGE
B.Tech in Computer and Communication Engineering	Amrita Viswa Vidyapeetham	2027	8.72/10
+2 / Intermediate / PUC / HSc	Bhashyam Junior College	2023	97.5%
10 th	Bhashyam High School	2021	99.8%

OTHER RELEVANT PROJECTS

Hotel Management System (2024)

Technologies: Python, Arrays, Linked Lists, Hash Maps

- Developed a console-based application to manage hotel room bookings and guest operations.
- Structured reservation workflows using arrays, linked lists, and hash maps to optimize data management.
- Implemented login verification and ID-based check-in/check-out functionalities for better system control

Air Quality and Health Impact Analysis (2024–2025)

Technologies: Python, Pandas, NumPy, TensorFlow, Matplotlib, Seaborn

- Analysed historical air quality datasets to identify pollution trends and potential health risks.
- Engineered a time-series machine learning model to predict future air quality levels.
- Visualized insights using Matplotlib and Seaborn to interpret data patterns and correlations.

Art Gallery Management System (2024–2025)

Technologies: PHP, MySQL, CSS

- Designed and developed a dynamic web application to curate and manage digital art collections.
- Integrated PHP with MySQL to automate backend processes and enable real-time content updates.
- Collaborated on backend logic and debugged key components to improve system performance.

PROFESSIONAL CERTIFICATION

- AWS Certified Cloud Practitioner – Amazon Web Services, 2025

DOMAIN RELATED TECHNICAL SKILLS

- **Microcontrollers & Microprocessors:** LPC2148 (ARM7), TM4C123GH6PM (Cortex-M4), Arduino Uno
- **Single Board Computers:** Raspberry Pi (sensor integration using Sense HAT, Python-based interfacing)
- **Embedded Programming & Tools:** Embedded C, Keil µVision, Energia IDE, Python (GPIO control)

IT SKILLS

- **Programming Languages:** C, C#, Python, SQL
- **Web & Frameworks:** HTML, CSS, PHP
- **Database Tools:** MySQL, SQL Server
- **IDEs & Tools:** Visual Studio, Google Collab
- **Libraries & Packages:** NumPy, Pandas, scikit-learn, Matplotlib, Seaborn, TensorFlow

PAPERS PRESENTED / PUBLISHED / WORKSHOPS / SEMINARS

- Attended Android Development Workshop by GDSC, Amrita 2023

HOBBIES

- Sketching, reading fiction, listening to music

PERSONAL STRENGTHS

- Self-motivated and consistent with a strong focus on learning and improvement
- Quick to adapt to new technologies, tools, and work environments
- Strong time management and organizational skills
- Calm and composed under pressure with a practical problem-solving mindset
- Works well in collaborative settings with a clear and thoughtful approach

PERSONAL DETAILS

Date of Birth : 22-11-2005
Languages Known : Telugu, Hindi, English
Permanent Address : Naidupeta 4th lane, Koritipadu, Guntur, Andhrapradesh
